COMMITTEE LEARNING OBJECTIVES

This committee examines the general characteristics of joints, muscles and nerves. It defines the skeleton and can identify and show the muscles and joints of the upper and lower extremities. Defines the motor system.

It examines the process from the 4th week of embryological development to birth. Defines fetus and newborn. Examines muscle and nerve tissue histology.

Examines nerve and muscle tissue physiology. Describes the excitation and contraction properties of skeletal muscle. It detects synaptic transmission and examines the neuromuscular junction.

Examines DNA and RNA synthesis. Provides information about bone and cartilage biochemistry. It defines the regulation of gene expressions. Examines muscle biochemistry.

Defines the biology of genetic diseases and cancer.
