MARINE POLLUTION REDUCTION POLICY

Istanbul Okan University incorporates the protection of marine and coastal ecosystems, reduction of marine pollution and sustainable use of marine resources into environmental sustainability. It addresses marine ecosystem conservation, seawater quality and pollution reduction holistically in accordance with national legislation and international environmental principles.

Policy Core Actions;

- Protect marine and coastal ecosystems and sustain ecological balance.
- Develop measures to prevent and reduce pollution affecting marine environments.
- Protect and support marine life, habitats and biodiversity.
- Reduce impacts from marine pollution sources and control environmental risks.
- Reduce marine environmental impacts threatening human health and ensure safe conditions.
- Support and promote sustainable and responsible use of marine resources.
- Raise awareness of illegal, unreported and unregulated activities.
- Raise stakeholder awareness of and participation in marine conservation.
- Plan, coordinate, monitor and report marine pollution reduction activities.
- Monitor effectiveness and continuously improve practices through the PDCA cycle.
