SUSTAINABLE PROCUREMENT POLICY

Istanbul Okan University adopts environmental, social and economic sustainability in procurement and seeks efficient resource use, reduced environmental impacts and stronger ethical sourcing. It applies sustainable procurement holistically according to long-term quality, cost-effectiveness and institutional responsibility.

Policy Core Actions ;

- Consider environmental, social and economic sustainability in procurement and develop related practices.
- Reduce resource use, support energy efficiency and minimize waste.
- Prefer environmentally friendly, recyclable, durable and long-lasting products.
- Reduce environmental impacts and sustainability risks in purchasing.
- Support local suppliers and small businesses and strengthen sustainable supply chains.
- Work with suppliers respecting human rights, ethical working conditions and fair wages.
- Ensure transparency, integrity and accountability in procurement.
- Build supplier cooperation based on sustainability, ethics and mutual trust.
- Identify, assess and manage environmental, social and economic risks affecting sustainability objectives.
- Develop and implement innovative and sustainable procurement solutions.
- Plan, coordinate and implement procurement activities.
- Monitor effectiveness and continuously improve practices through the PDCA cycle.
